DETAILED ACTION

Response to Arguments

Applicant's arguments filed 8/18/2008 have been fully considered but they are not persuasive.

The Applicant argues that the Song reference fails to disclose a control unit to retrieve one or more collected data over the network. And further Song fails to disclose receiving an encrypted search term or the comparing of terms. And finally, Song does not disclose the encrypting of terms nor receive from a remote device.

The Examiner respectfully disagrees. Song discloses the data servers containing documents and searching of documents without the loss of confidentiality see Abstract Par. 1. And further discloses the building of encrypted file systems and secure mail servers see I. Introduction. This file system is searched for word and the query is hidden see I. Introduction Bullet 1. And the searching of encrypted data to locate an match and a further remote files 2. Searching on Encrypted Data.

Song reference deals with algorithms used for encrypted searching on secure/encrypted file systems. This includes the user accessing a file terms and retrieving the encrypted search term. Then the comparison with the term for closest match see Abstract.

The Applicant argument with regard to Claim 18 is persuasive.

Claim Rejections - 35 USC § 102

Regarding Claim 2-7, 9-14, 16-17, 19-20, Song discloses the use of hashing and encryption algorithm on terms see Fig. 2 & Fig. 3 and further mentions the use of database to search for terms see § 1-2.

Regarding Claim 15, Song discloses the a storage unit see § Abstract & § 1 ; and a control unit communicatively coupled to the storage unit, the control unit adapted to

Art Unit: 2432

access one or more terms associated with one or more remote files over a network;
store the accessed one or more terms in the storage unit see § 4.3 Par. 1; encrypt the
stored one or more terms; receive an encrypted search term from a user see § 4.3 Par.
2; access the storage unit to retrieve one or more of the encrypted accessed terms in
device see § 1 Bullet 1; compare the received encrypted search term with the encrypted
accessed terms § 4.3 Par. 4; and provide a result of the comparison over the network
see § 4.3 Par. 4.

Allowable Subject Matter

Claim 18 is objected to as being dependent upon a rejected base claim, but would be
